WEBINAR SERIES

Join us for a **FREE**

WEBINAR

DATE: Wednesday, October 26, 2016

9:00 Singapore Time (UTC/GMT+8)

21:00 (Oct 25) Eastern U.S. Time
(UTC/GMT-4)

SPEAKER: **Dr. James Cock**

Agricultural Consultant, Southeast Asia Program

TOPIC: **Homologous Event**

Dr. James Cock will describe the system of Homologous Events (HE) that the IPNI Plantation Intelligence group has developed for Oil Palm. The HE system provides managers with a tool to characterize

the growing conditions of individual fields over time. Similar conditions are defined as HEs. Yield variation within and across homologous events is analyzed with a view to providing managers with information on how distinct management practices affect yield. Examples are presented for fertilizer response. The same approach can readily be applied to other crops.
