WEBINAR

DATE: Wednesday, January 11, 2017
12 PM EST (5 PM GMT)

SPEAKER: **Dr. Cliff Snyder**
Nitrogen Program Director

TOPIC: **Enhanced Nitrogen Fertilizer Technologies Support the '4R' Concept to Optimize Crop Production and Minimize Environmental Losses**

*Fertilizer nitrogen (N) helps to nourish, clothe, and also provide bioenergy for the growing global population. Agricultural efforts are increasing to better manage N and address the risks of unintended loss of N to the environment, including: reductions in emissions of ammonia (NH₃) and nitrous oxide (N₂O), and losses of nitrate-N (NO₃-N) to surface and groundwater resources. **Dr. Snyder** will talk about enhanced efficiency fertilizer N technologies.*
