

International Stewardship Symposium in Saskatoon, Saskatchewan – July 15-16, 2014

The Canadian Fertilizer Institute (CFI) in partnership with The Fertilizer Institute (TFI), the International Fertilizer Industry Association (IFA), the International Plant Nutrition Institute (IPNI), and the University of Saskatchewan—through the Global Institute for Food Security and other academic partners—will be holding an International Stewardship Symposium entitled *Feeding Crops to Feed the World* on July 15-16, 2014 in Saskatoon, Saskatchewan.

The theme of this conference is focused on 4R Nutrient Stewardship's role in feeding the world, stewardship and greenhouse gas reduction, sustainability and how we measure our progress on a global scale. The conference will feature a seminar series entitled "*Utilizing 4R Nutrient Stewardship to Reduce Greenhouse Gas Emissions from the Application of Fertilizer and Other Crop Nutrients*" focusing on the role of 4R

Nutrient Stewardship in reducing greenhouse gas emissions and improving the efficiency of crop production.

Examples of other planned sessions include international speakers on Extension & Smallholder Farms, Economics & Development, and Planetary Boundaries and Nutrient Use Efficiency.

Registration is now open at www.stewardshipsymposium.com where more information is available on the symposium speakers and the program. This website will be updated regularly, so please check back often. **BC**

The InfoAg Conference in St. Louis, Missouri – July 29-31, 2014

IPNI extends an invitation to all interested in the very latest precision agriculture information and technology to make plans to attend InfoAg this July.

Building on the especially strong momentum precision agriculture is gaining; the traditionally biennial event has been moved to annual schedule beginning this summer. InfoAg will be held July 29-31 at the Union Station Hotel in St. Louis, Missouri.

Since 1994, the InfoAg Conference has been the premier event for the discussion and advancement of precision agriculture. This event draws interest from domestic and international agriculture professionals and features a wide range of educational and networking opportunities for professionals interested in learning more about precision agriculture techniques.

The InfoAg 2014 Conference will focus on the application of precision technology and information management for a wide array of crops including cotton, soybeans, corn, and wheat. InfoAg is the perfect venue for you to grow and deepen your market relationships and place your company's brand in front of hundreds of qualified buyers ready to do business with your company.
