

## Proceedings of the Symposium “Integrating Weather Variability into Nitrogen Recommendations”

The weather controls a great deal of the crop response to nitrogen. The contents of a new publication titled *Managing Crop Nitrogen for Weather*, based on the proceedings of a symposium at the 2006 meeting of the Soil Science Society of America (SSSA), provide details of experimental data and experiences of those engaged in efforts to improve prediction of crop nitrogen needs in response to weather conditions.

The papers contained in this 132-page publication were originally presented at the Symposium “Integrating Weather Variability into Nitrogen Recommendations.” Thirteen of the original presentations from the Symposium are contained in the publication, plus abstracts of others. The authors are from several different countries and are recognized scientific authorities on their topics. The International Plant Nutrition Institute (IPNI) published the proceedings.

The publication is paper-bound, 8½ x 11 in., and contains some color. It is available for purchase from IPNI for US\$50.00 plus shipping/handling.

## Posters Feature Forage Legumes and Grasses/ *Southern Forages* Book Now in Fourth Edition

Two educational 24 x 30-in. posters, *Forages Legumes* and *Forage Grasses*, are now available from IPNI. Each poster features color photographs of 30 species of important forage plants, along with descriptive text on seeding/establishment, fertility needs, pest considerations, and other practical tips.

The posters were prepared by the authors of the popular book, *Southern Forages*. They are Dr. Don Ball, Auburn University; Dr. Carl Hoveland, University of Georgia; and Dr. Garry Lacefield, University of Kentucky. The book was first published in 1991 and has become a standard among farmers, educators, horse owners, individuals managing wild-life plots, and many others.

“The new posters provide one more level of information accessibility for the many people interested in forage grasses and legumes. We have seen the popularity and usefulness of the *Southern Forages* book for many types of audiences and believe the posters will effectively enhance understanding of forage production and management,” noted IPNI President Dr. Terry Roberts. Many of the species included on the posters are grown across large areas of North America and some in other countries.

The posters would be appropriate for display in classrooms, seed outlets and farm stores, Extension and soil/water conser-

vation meeting rooms, farm offices, and various other settings. A single poster is available for purchase at US\$3.00 plus shipping. The cost for a set including one of each poster is US\$8.00 sent folded or US\$9.00 rolled in a mailing tube.

The Fourth Edition of the book *Southern Forages* was published by IPNI in early 2007 and is now available for US\$30.00 plus US\$4.00 shipping and handling for a single copy. Discounts are available on larger quantities.
