

Wheat experimental field at EEA INTA Paraná (Entre Ríos).

variability of NDVI determinations for wheat and maize are obtained with 4 to 6 sensor units for standard fertilizer applicators. Also, NDVI variability decreases as crop development progress.

Future work should be oriented to expand the evaluation of remote sensors to a wider range of environmental conditions to make N application models more robust, and to promote the development of local techniques and equipment. **BC**

Acknowledgments

Dr. William Raun (OSU), Agustín Bianchini (AAPRESID) and the participants of the Precision Agriculture Project of INTA at EEA Paraná.

Support for this research was provided by the Agreement “Improvement of nitrogen use efficiency through remote sensing techniques” of INTA, PROFERTIL, and AAPRESID, the INTA project “Development and application of precision agriculture techniques for crop management” (AEAI3722), PASA, and D&E SA.

Mr. Melchiori, M.S., is research agronomist at INTA, EEA Paraná, Group of Natural Resources and Abiotic Factors, at Paraná, Entre

IPNI Joins as a Supporter and Exhibitor for AG CONNECT Expo in January 2011

As North America’s new global agriculture exhibition, AG CONNECT Expo 2011 in Atlanta, Georgia, will feature international exhibit pavilions from major world regions, including Europe, South America, and Asia. AG CONNECT Expo 2011 runs January 8-10, with Preview Day January 7 by special admission. IPNI will have an exhibit at the event and will sponsor two educational presentations by Dr. Harold F. Reetz.

International exhibit pavilions at AG CONNECT Expo bring an added dimension to the show floor, providing attendees with a convenient and cost-effective opportunity to examine new products and technologies from companies around the world. Key countries already signed on to sponsor pavilions

at AG CONNECT Expo 2011 are Argentina, Brazil, Canada, China, Germany, and Italy. There will also be a European pavilion at the show. The inaugural AG CONNECT Expo, in 2010, had approximately 20% international registrants with more than 60 countries represented.

AG CONNECT Expo is organized by the Association of Equipment Manufacturers (AEM), with direction from industry companies and organizations. For more information on AG CONNECT Expo 2011, visit www.agconnect.com.
