

FUN WITH THE PLANT NUTRIENT TEAM

An educational activity book for use in kindergarten through third grade is now available. The book, a project of PPI and FAR, encompasses information about the importance of plant nutrients and basic concepts of food and fiber production.

"Because so many children today don't grow up on farms, they may not realize how plants grow and where food and fiber products originate," said Dr. David W. Dibb, President of PPI. "Our challenge was to produce an activity book that will be entertaining but also educational for young children. We believe we have met the challenge with *Fun with the Plant Nutrient Team*."

The 24-page book features nitro-

gen (N), phosphorus (P) and potassium (K) as characters in a variety of activities such as dot-to-dot, word puzzles, coloring, mazes, matching pictures and experiments. Principles such as soil conservation and science as part of modern agriculture are included.

A sample copy of *Fun with the Plant Nutrient Team* can be purchased for \$3.00. Additional copies are \$1.00 each, plus shipping/handling. A

teacher's guide with additional information, experiments, facts and resources is also available on request.
